

MRACETEAM

**MARCUS
TERKILDSSEN**

LIGIER

EUROPEAN SERIES

Marcus Terkildsen is a 16 year old racing driver with clear ambitions to compete in international motorsport at the highest level. With a strong foundation in karting, he transitioned to car racing in 2024, competing in **Formula 5** and **TCR endurance racing** that year.

In his debut season in the **Danish Endurance Championship**, Marcus delivered strong performances in a **Cupra TCR**, finishing on the overall podium. At just 14 years old, he became the youngest driver ever to both race and win in a TCR car, and was subsequently recognised as **Motorsport Talent of the Year**. In **Super GT 2L** in 2025 he also became the youngest driver to ever win a heat.

Professional mindset

- Marcus operates with a professional, long term performance mindset. His preparation includes physical training, mental performance, data analysis and extensive simulator work, competing regularly against national and international drivers. He is also selected as a Team Danmark Elite Talent, receiving professional support for both sport and education.

Future vision and partnerships

- Marcus aims to progress into international prototype racing. Motorsport is a resource demanding sport, and strong partnerships are essential to support long term development and competition at the highest level. Sponsors become an integral part of a professional and ambitious motorsport project, gaining visibility and long term brand value.

CV & MY CAREER

A progressive journey through competitive motorsport.

SOME & MEDIA COVERAGE

Admin By Request renews sponsorship of MT Raceteam for the 2026 Season

MT Raceteam is proud to announce that Admin By Request will continue as an official sponsor for the upcoming season. The renewed partnership highlights a

2025 Season Recap: A Breakthrough Year for 15-Year-Old Marcus Terkildsen in Super GT and TCR

The 2025 racing season marked a major breakthrough for Danish racing talent Marcus Terkildsen, who at just 15 years old completed his first full year in national motorsport with impressive results in both Super GT Denmark and TCR Denmark in the CUPRA TCR. Despite... [Læs mere](#)

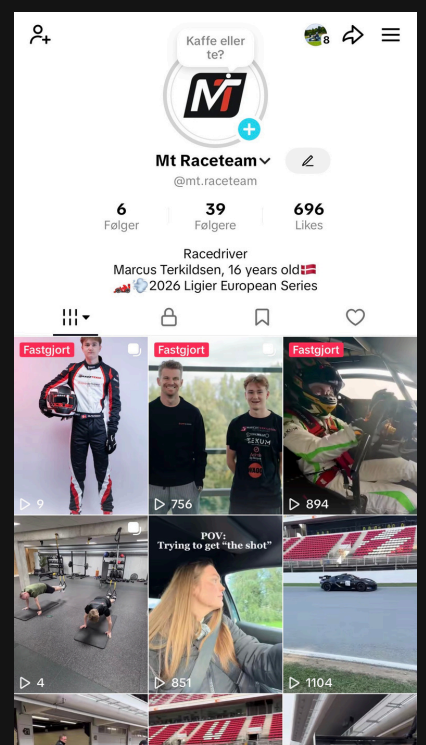

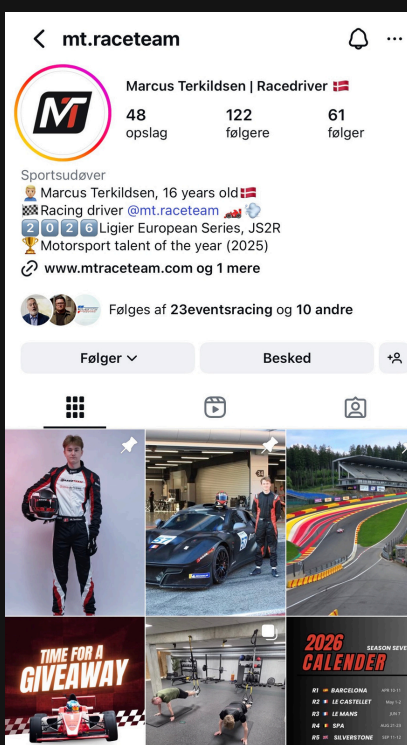

2026 race-season announcement: Come along for the ride!

MT Raceteam is proud to announce its 2026 entry into the prestigious Ligier European Series, where the team will compete in a state-of-the-art Ligier JS2 R supplied

MT Raceteam delivers strong public visibility through professional media and social media coverage. The team works with a dedicated film partner, Drivrs, supported by an in house Social Media Manager and Content Creator. The racing series also provides official media coverage.

There are public updates before, during and after each race across all social platforms, supported by a press release. All produced content is available for free use by sponsors, creating consistent exposure and strong marketing value throughout the season.

The Ligier European Series is a professional European one make racing championship designed to develop drivers and teams in a highly competitive and structured environment. The series features identical Ligier race cars, ensuring close racing where performance is determined **by driver skill, preparation and team execution.**

Competing on iconic European circuits alongside major endurance events, the championship offers a **premium international platform** with strong media exposure and a professional paddock setting. Widely recognised as a stepping stone toward higher level endurance and GT racing, the Ligier European Series represents ambition, progression and credibility, making it an attractive platform for sponsors seeking visibility within international motorsport.

2026 SEASON LIGIER EUROPEAN SERIES

The **Ligier JS2 R** is a purebred race car, not a converted road vehicle. Every detail is engineered for competition, safety and visual impact. From on the track and on camera to all digital media.

- FIA-homologated carbon monocoque
- Advanced aerodynamics with front splitter and rear wing
- 6-speed sequential gearbox with paddle shift
- Naturally aspirated V6 engine producing approx. 350 hp

The result is a car that looks professional, performs consistently and represents partners at the highest level.
